## SUMMARY

I have **two years** of expertise as a seasoned front-end developer, and I specialize in building solid applications that are specifically suited to **address corporate demands**. My most recent accomplishment, creating a scalable website, serves as an example of how my technical proficiency and attention to detail guarantee efficient **project execution**. This success was crucial in helping my business obtain **a fifty million naira (#50,000,000) investment**. I am excellent at promoting **open communication, flexibility, and teamwork**, all of which are crucial for fruitful **partnerships and efficient problem-solving** among various teams. Beyond my work, I'm passionate about imparting my knowledge of software development trends, artificial intelligence, and tech tools to others in order to help them improve and learn on LinkedIn.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript and TypeScript

**Web Technologies:** HTML, CSS, TailwindCSS, BootStrap, ReactJS, Redux, NextJS, and Typescript

**Tools:** Babel, Git/Github, CI/CD, Figma, Jira, Npm, Postman, Staging, Linux, Nginx, and Webpack

## EXPERIENCE

**Roovas** (in development stage) | **Founding frontend developer (remote)** | <https://rental-six.vercel.app/>

April 2023 – October 2023

A rental solution company that connects homeowners and tenants in the property rental market streamlines the rental process for tenants and landlords for a clear, cheap, and stress-free experience.

- I created the website **entirely on my own** and assured scalability through effective coding techniques, which helped the business attract an investor and **secure a fifty million naira (#50,000,000) investment**.
- I created and developed user-friendly interfaces so that property owners can register their properties and list them, and tenants can look for apartments and submit applications.
- I turned **intricate Figma ideas into useful**, responsive pages to produce user experiences that are simple to use and visually beautiful.
- I utilized **SEO best practices** to raise the website's visibility and search engine rankings, such as using structured data and meta tags.
- I utilized CI/CD, Babel, Redux, Jest, Framer Motion, Webpack, Git/GitHub, CSS, JavaScript, Tailwind CSS, React.js, and BootStrap.

**Ebeano Market** | **Frontend developer (remote)** | <https://marketplace.ebeanomarket.ng/>

February 2022 - March 2023

- I redesigned the corporate website in **collaboration with the PM, QA analyst**, and other engineers, resulting in a modern and user-friendly layout.
- I successfully **converted a legacy Vue.js codebase to React.js**, which enhanced the e-commerce website's performance and maintainability.
- I reduced load times by 28% and **increased overall website speed** by adopting data structure, algorithms, and efficient coding techniques to improve website performance.
- I worked with back-end programmers to **incorporate RESTful APIs**, boosting the functionality of the application and data retrieval.

## PERSONAL PROJECT

**WhatsApp Web clone** | **ReactJS & Firebase** | <https://whatsapp-web-clone-dd630.web.app/>

- I integrated Firebase to enable users to send and receive messages in real-time, giving users a smooth communication experience.
- I created a function that lets users send up to ten photos in a message, improving user experience by facilitating multi-media communication.
- I incorporated Google Sign-In authentication to handle user authentication, guaranteeing a dependable, seamless, and intuitive login process and safe access to the application.

**Ajaniti40** | **NextJS & TypeScript** | <https://www.ajaniti40.com/>

- I integrated Firebase to enable users to send and receive messages in real-time, giving users a smooth communication experience.
- I created a function that lets users send up to ten photos in a message, improving user experience by facilitating multi-media communication.
- I incorporated Google Sign-In authentication to handle user authentication, guaranteeing a dependable, seamless, and intuitive login process and safe access to the application.

## COMMUNITY WORK

ALX Africa - **Software Engineering students' portfolio project review**

Septemer 2023 - Septemer 2023

- I reviewed and provided constructive feedback on 30 ALX software engineering program participants' portfolio project submissions.

- I helped uplift students' coding expertise and problem-solving skills by mentoring and guiding them.

## CERTIFICATION

ALX certified software engineer - <https://intranet.alxswe.com/certificates/f5MsneH3C6>

Side Hustle certified front-end web developer - <https://certificate.terrahq.co/78849QDAHMHJHNC14>

## EDUCATION

SEPTEMBER 2023 - DECEMBER 2024

Centennial College, Scarborough, ON, - Software Engineering
